Standard Level of Service (SLS)

This service provides academic support for the parent only. This service works best for the family whose primary educator is the parent or guardian. As you oversee the course work and progress of your student, the Academy faculty and staff will provide counseling, academic support, grading, and record keeping.

Parents of any student enrolled in grades K-8, or any high school student using the Standard Level of Service, must name the adult supervisor who will oversee the student's daily coursework.

Enhanced Student Service (ESS)

This service provides support for the parent and the student. The student can be

assigned to a specific class supervised by a qualified HCA teacher. The student also has access to that teacher by phone and email. ESS can be purchased for a single subject or an entire academic program. Parents who are unfamiliar with distance learning or have doubts about teaching a particular subject may enjoy the ESS service level. Visit the ESS Document online for detailed course descriptions.

NOTE: Diagnostic testing, achievement testing, record keeping, and accredited transcripts and diplomas are provided with both the SLS and ESS service levels.
